a top, bottom and sidewalls.

Regarding claim 4, each wire receiving passageway has an opening adjacent the pin.

Regarding claim 5, a wire is managed through the hinged wire manager by passing through the wire receiving passageway of the first arm, being looped around the pin, passing through the wire receiving passageway of the second arm and being connected to a component on the component mounting board.

Allowable Subject Matter

3. Claims 6-7, 9-10 are allowed.

Response to Arguments

4. Applicant's arguments filed September 17, 2004 have been fully considered. Applicant's amendment has been effective in overcoming the previous 35 U.S.C. 112 rejection. Regarding the rejection under 35 U.S.C. 102(b), Applicant stated that the cited reference does not disclose or suggest the recited feature of a "hinged wire manager being mounted between one of the movable side walls and one of the outside walls". It is believed that the above-mentioned claim limitation is met. It may be considered that the hinged wire manager 100 is mounted between one of the movable side walls (one of side walls of drawer 106) and one of the outside walls (fixed wall attached to the other, opposing side wall of drawer 106) and between the top and bottom walls of the drawer 106, fully meeting the claimed limitation. Therefore, the rejection of claims 1-5 has been maintained.
